**TIME: 6:30 PM—7:30 PM**

**ROOM 100**

## **AMIE SEISAY**

### **Speaker Bio:**

The owner of Seisay IT Solutions, Amie Seisay has over ten years of experience in the IT field, working in numerous professional environments. Amie's credentials include both a bachelors and master's degree in Computer Science. She also holds a number of IT and Microsoft certifications, most notably MCTS 70-667: Microsoft SharePoint Configuration, ITIL Foundation, and CompTIA Technical Trainer. Through the years, Amie has broadened her professional experience and technical expertise through her work with a number of small and mid-size businesses, creating web-based applications, especially SharePoint. It was through this work that Amie discovered her true passion: to work one-on-one with clients to understand their specific needs and develop customized technology and IT solutions to improve their business processes. As a result, Amie decided to formalize her consulting services as a Microsoft Partner under the moniker Seisay IT Solutions in order to provide web application based consulting and training tailored to her clients' needs.

### **Description:**

In 2014, at the age of 32, Amie Seisay, decided to start her own IT consulting business. After a decade of working in IT in numerous professional environments, Amie started to feel professionally unfulfilled. Realizing that she could not simply walk away from her full-time job, Amie set a plan in motion that would put her on the path to owning her own business, in order to realize her professional aspirations: to work one-on-one with clients on projects she found challenging, rewarding, and was passionate about. In this presentation, Amie will cover her journey in becoming a tech entrepreneur and her lessons learned.
